

9W Outdoor PIR Sensor Light Bulb Security 1000ml Luminous Lux

Our Product Introduction

for more products please visit us on led-lightsbulb.com

Basic Information

- Place of Origin: Shenzhen. China
- Brand Name: NCJ TECH
- Model Number: NSL-AL01
- Minimum Order Quantity: 100 pcs
- Price: Negotiation
- Packaging Details: White box + Outer box (K=A)
- Delivery Time: 1: Sample and small order: Within 7 working days after receiving your payment. 2: Bulk order: 3-4 weeks after receiving your deposit.
- Payment Terms: T/T, Paypal
- Supply Ability: 10000pcs per month

Product Specification

- Material: Aluminum+PC Housing
- Beam Angle: 120°
- Luminous Lux: 1000ml
- Color Temperature: 3000k-6500k
- Voltage: AC85-265V
- Wattage: 5W/7W/9W
- Highlight: Security PIR Sensor Light Bulb, PIR Sensor Light Bulb 1000ml, 9W Outdoor Sensor Light Bulb

Product Description

5W/7W/9W Passive Infrared Sensor Lights for Various Applications

PIR Sensor Lights are motion-activated lights that are equipped with a passive infrared (PIR) sensor, enabling them to detect infrared radiation given off by objects. They are designed to provide an extra layer of security and can be used in both residential and commercial settings. These lights are perfect for illuminating large outdoor spaces, such as yards, driveways, and parking lots. These lights feature a wattage of 5W, 7W, and 9W, a beam angle of 120°. They come in a variety of color temperatures ranging from 3000K to 6500K, and are suitable for use with AC85-265V voltage. These infrared detecting lights are an ideal choice for providing a safe and secure environment.

Technical Parameters:

Feature	Specification
Product Type	Motion-Detection Lights, Passive Infrared Sensor Lights, Motion-Detection Lights, PIR Sensor Lights
Voltage	AC85-265V
Working Temperature	20 — 40
Color Temperature	3000k-6500k
Storage Temperature	20 — 80
Luminous Lux	1000ml
Material	Aluminum+PC Housing
Wattage	5W/7W/9W
Beam Angle	120°

1. During the day, people and cars pass by, and the lights will not light up.

2. At night people enter the detection area and the lights automatically light up.

3. The person moves in the detection area until the person waves, the light continues to light up

4. After the person leaves the sensing range for 50-60 seconds, it automatically turn off

Support and Services:

Our PIR Sensor Lights come with technical support and services. We provide comprehensive support to make sure our customers get the most out of their product. Our team of experts is available to answer any questions you might have about setup, installation, and maintenance. We also offer regular software updates so that your product is always up-to-date. If you experience any issues with your PIR Sensor Lights, our knowledgeable support staff is here to help you troubleshoot and resolve the problem.

Packing and Shipping:

Packaging and Shipping

PIR Sensor Lights should be packaged and shipped with care. They should be placed in a securely sealed box, surrounded by bubble wrap or other cushioning material. The box should be labeled clearly with the product name and address of the recipient. When shipping PIR Sensor Lights, a reliable shipping carrier should be used. The shipping carrier should be able to provide tracking information so that the package can be monitored during transit. The package should also be insured for any damages or losses that may occur while in transit.
